WHAT IS THE MID-COAST WATER PLANNING PARTNERSHIP?

- In June 2016 the City of Newport received a grant from the Oregon Water Resources Department (OWRD) to develop a collaborative, integrated water planning effort that looks at instream and out-of-stream water needs while considering water quantity, quality and ecosystem health.
- The City and OWRD together act as conveners for the <u>Mid-Coast Water Planning Partnership</u>, a diverse group who have been work together to understand and meet our collective water needs.

PLACE BASED PLANNING

The Mid-Coast area was one of 4 planning regions selected to pilot the Place Based Planning process

HOW DOES IT WORK?

Over the three-year planning phase, the Partnership will explore strategies to:

- Replace aging infrastructure, improve conservation, enhance regional water supply options, and more effectively share water.
- Relieve pressure on rivers, streams, and tributaries while meeting the water needs for coastal communities and industries.
- Create redundancies in our systems so we are more resilient to drought, storms, and other natural vulnerabilities.
- Create a learning and action network for small water providers who are often most vulnerable to environmental and regulatory challenges.
- Identify and facilitate cooperative solutions among local partners.
