RECEIVED

APR 13 19

CITY OF
YACHATS

TO: Yachats Roads and Streets Committee
and City Council

From: Bev & Fritz Barmore

We live up E. 2nd Street....414 E. 2nd to be exact and have lived here in Yachats for 16 years.

In the last few years we increasingly have difficulty getting down 2nd Street and onto 101. With the slant parking allowed on 2nd from Prospect on down, the pickups seem to be the preferred vehicles to park there and they are way too long for that street. They stick out so far that we must go over the edge of the pavement to get by. Some cars don't pull forward enough and stick out as well.

At the far western end of E. 2nd we must go way off the pavement and there is a long hole there that needs re-paving and fixing right by where all the buoys are on the fence.

Then when we get right to 101, it is impossible to see around the left hand corner to see if a car is coming and most of them are coming way faster than 25 mph. Soooo we are taking our lives in our hands just getting out to make a right turn on 101. To go straight across to the grocery store is even more dangerous and to go left is nearly impossible during the day. At night, you can see lights coming north on 101 which helps us get out.

Have any of you ever considered making Prospect one way again downhill. It used to be a narrow two way, but the delivery trucks make it almost impossible to get up or down sometimes.

If 2nd was one way up hill from 101 to Prospect we would still have to navigate the big long hole by the buoys and snake past all the pickups angle parked.

These are serious issues for those of us living uphill and ones that we would hope you would seriously consider and letting us have input as well. Also there is a deep hole on the left side of 2nd St. going up hill right across from Barbara Frye's home.

Thanks for your considerations of our issues!!!
