

Dear Planning Commissioners:

I understand that there have been a number of requests recently for release from the set-back provisions with regard to riparian areas. I commend you for having rejected those requests.

It was only through great effort and solid research findings that the provisions for mandatory set-backs from streams and water sources were enacted. I trust you will continue to respect those efforts and findings and not bow to pressures that some might apply to circumvent these very wise and prudent provisions to accommodate their own narrow interests.

Thank you.
